# VOIP BASED WHITE LABEL APPLICATION

## FEATURE LIST

Document Version 2.0, 2011

# Reseller Interface Features

## Unlimited Brands

Reseller can create unlimited brands/packages. A brand will be assigned to users and resellers. Reseller can use any name as brand name, For example: Pay As You Go, Call USA Unlimited etc.

## Unlimited Users

Reseller can create unlimited users. A user is a customer who can buy and use services offered by that reseller.

Each user is assigned a Pin Number that can be used as a Calling Card Number while using Phone-to-phone service.

## Unlimited Resellers

A reseller can add sub-resellers under his account. There is not limit to add sub-resellers.

Reseller can also create multiple resellers and assign different rates to different sub-resellers.

## Selling Routes (Rates offered by a reseller to sub-resellers)

A sub-reseller can view the rates offered by his reseller as Buying Rates. Reseller can sell the services to his customers in his own rates.

Further more, he can also set his own price, connection fee and billing increment information

## Selling Routes (Sub-Reseller's own A to Z Call Termination)

If a sub-reseller disagrees with the rates offered by his reseller then he can avail an option to add any third party vendor and he can sell his own A to Z Call Termination in his own rates

## Adding Multiple Vendors

A sub-reseller has an option to sell reseller's routes or his own routes purchased from any third party to his customers or further-resellers.

Reseller can add unlimited vendors using SIP Settings. Additionally he can add vendors at his own will.

“ a sub-reseller can always add any third party vendor to sell his own AtoZ Call Termination. ”

Call history serves as a tool for monitoring and analyzing business.

#### Recharging Users

Reseller can add funds in his user's account.

#### Live Call Monitoring

Reseller can monitor the connected calls in real-time.

#### Call History

A call history feature is available in reseller's panel. Where each record can be viewed with related data such as buying cost, selling cost, profit, duration and call date.

Call history also serves as a tool for monitoring and analyzing business.

#### Reseller's Profit report

Profit report is available to resellers to calculate the profit on daily basis.

#### Runtime Notifications

Reseller gets notifications automatically in Reseller Panel while losing money in Buying or Selling Rate.

#### Gimmicks

Gimmicks are being used widely these days. Reseller can set a markup value as a gimmick for certain users so that actual call duration will be less than the prompt call duration.

Such gimmicks are frequently implemented in calling cards businesses to earn more profit

#### Reseller's Visual Branding (Optional Feature)

Reseller will be able to upload his own logo. This logo will be displayed to his sub-resellers and users over the website and Pc-to-Phone dialer.

Whereas a sub-reseller can also add his own logo for his own customers.

#### Host [www.Rextee.Com](http://www.Rextee.Com) at [www.YourOwnCompany.Com](http://www.YourOwnCompany.Com) (Optional Feature)

After adding reseller's own logo, reseller will be able to host his Reseller's panel and User Panel on his own domain. Where his users and sub-resellers will be able to login through [www.YourOwnCompany.Com](http://www.YourOwnCompany.Com) instead of [www.Rextee.Com](http://www.Rextee.Com)

#### Sell SMS Rates (Optional Feature)

A sub-reseller will be able to buy SMS Rates from his reseller and third party vendors so that he can offer SMS Services to his further-resellers and users.

# User Interface Features

## Personal Details

User can update his personal and contact details from user interface.

## Pc-to-Phone Service

User can use Rextee Pc-to-Phone dialer to make calls. Pc-to-Phone dialer also displays account balance.

## Phone to Phone/Calling Card Service

User can make calls using Rextee.com local access numbers in USA, Canada, and Germany etc. More access numbers can be added by Rextee.com Admin.

## Pin-less Dial (Phone-to-Phone Caller ID Authentication)

User can use pin-less dial feature to make calls without entering a pin number. He can add unlimited phone numbers in pin-less dial feature.

## Speed dial (In Phone-to-Phone Service)

User can add unlimited speed dial short codes therefore, while using phone-to-phone service he can dial short code instead of a full phone number.

## SIP Settings

SIP Settings are available for each user and reseller in the user interface.

User can use these sip settings to configure ATAs (Analogue Telephony Adaptors), IP Phones and SIP Software.

Same SIP settings can be used in any SIP Server or VoIP Switch for Calls Termination purposes.

## IAX Settings

IAX is a non-standard protocol introduced by Asterisk (Open source PBX) for Asterisk to Asterisk communication. Rextee.Com user and reseller can get IAX Settings from User Interface to use his account in Asterisk Open source PBX or in any IAX Supported ATA, IP Phone and IAX Software.

## Third Party Mobile Dialer Settings (Fring, Nimbuzz)

SIP Setting and Configuration for third party mobile dialers is available in Rextee.com user interface.

User can use his rextee.com account on Nimbuzz and Fring mobile dialers.

Supports ATAs (Analogue  
Telephony Adaptors),  
IP Phones and SIP Software

#### Web Call-Back (Optional Feature)

User will be able to initiate a call-back from user interface.

#### SMS Call-Back (Optional Feature)

User will also be able to initiate call-back by sending a sms.

#### Telephone Call-Back (Optional Feature)

User will be able to initiate a call-back by dialing an access number. His call will not be answered but he will receive a call-back from Rextee Server and he can dial destination number once a call-back is received.

#### Mobile Software for Call-Back (Optional Feature)

User will be able to initiate call-back using a mobile application through GPRS, 3G or Wifi.

#### Send SMS (Optional Feature)

User will be able to send text messages at any international mobile number. He will be charged for the rate offered by his reseller for different countries.
